

LEGAL INDUSTRY

TOP 10 REASONS TO USE

N-Krypt International offers the legal industry a unique email solution that allows you to do everything you wish you could do to your regular email, without the need to install, replace, or modify your existing email network. N-Krypt (powered by email2) is a leader in enhancing email communications by adding security, audit trail, real-time tracking, mega-file sizes, and video messaging through your regular email account and email clients by using your own Corporately-branded Private Email Network (PEN). Benefits include:

1. ***Audit Trail & Real-time Tracking*** – Law firms now have the ability to track if messages sent or received have been read, replied-to, deleted, printed, or even forwarded (including when and who they have been forwarded to).
2. ***Video & Voice Messaging*** – Ever hear complaints about not having enough “Face-Time” with your clients? With integrated video & voice messaging, you can now securely record a message to your clients and really tell them how you feel about a specific clause just as though they were sitting right in front of you.
3. ***Recall Feature*** – With our unique recall feature, users can instantly recall messages sent in error without any time limitations. It also does not matter if the recipient has already viewed or opened the message.
4. ***Lawyer-Client Confidentiality*** – Our system also ensures Lawyer-Client confidentiality with its patent-pending audit trail, real-time tracking, and multiple security features.
5. ***Secure & Compliant System*** – The N-Krypt solution uses two levels of secure, trusted encryption algorithms (SSL & AES). Our system is also a compliance enabler ensuring full compatibility with most of your client’s regulation requirements.
6. ***Send Large File Sizes*** – Ever have a problem sending large files? Perhaps you can send them, but your recipient cannot receive them? Our system bypasses this limitation by allowing you to send any file type from 250MB to a maximum of 20GB/message.
7. ***Save on Courier & Faxing costs*** – Finally go paperless! With the combination of an Audit Trail & Sending Large File sizes, your organization can now save time & money by substituting a portion of your monthly courier, and faxing costs. You can now send documents quicker, to the correct recipient, and with an audit trail all through the comfort of your regular email account.

8. **Corporate Branding** – No longer do you need to be a large Enterprise to have your logo or brand effectively marketed. With your own Private Email Network (PEN), your corporate logo or brand will be openly visible by all of your users raising the professional image of your organization.
9. **Zero Downloads** – There is zero downloads required to use the Private Email Network, including for lawyers, associates, and clients. It also doesn't matter what type of email address you have to join, even if it's Gmail, Hotmail, Yahoo, or your own corporate domain.
10. **Even use with your Mobile Device** – Not only can you and your clients use our system with any web browser, and Outlook 2003 & 2007 client, but you can also use it on any of the leading mobile phones and devices. Our system is completely compatible with the iPhone, Blackberry, Windows Mobile, and Symbian devices. There is also no extra charges to use any or all of these clients.

Test drive the solution with a live demonstration. Contact us at 1-877-2-NKRYPT or sales@n-kryptcorp.com. Also be sure to check out several great links on our website:
