USPTO Patents Pending #20070005713, 20070005714, 20070005715, 20070005716, 20070005717, 20070113101

Providing clients Corporate Communications Infrastructure similar to that of a F100 company for a low monthly fee or as a client-hosted model

Recent legislation by Nevada (effective Oct 1, 2008) and Massachusetts (effective May 1, 2009) requires businesses to encrypt Private Information for customers via email. With the N-Krypt solution, we cater solutions from small firms to large enterprise, for not only security, but also audit-trail, real-time tracking, mega file-size delivery, and integrated video & voice messaging.

Why settle for only security when you can save time, money, and improve ROI at the same time at a fraction of the cost.

Register for a free Webinar today!

Features:

- Uses your existing email address & infrastructure
- Full Audit trail of all messages sent & received
- Real-time tracking of all messages & True Recall feature
